m:con_vidoc

m:con is going new ways: an innovative solution for online live transmission and on-demand availability of lectures. Some people are hindered attending a congress due to lack of time. Lots of potential participants are only interested in a specific lecture. We have developed **m:con_vidoc** so that you can in future also reach these target groups.

Speakers- online-Corner

Congresses, conferences and events without participation limits: m:con_vidoc.

m:con_vidoc is a special form of video documentation: The user can – live or at a later date – simultaneously follow a speaker's lecture in video and view their presentation slides and documents. **Participants could also choose selective single themes from a lecture.**

The **m:con_vidoc** video documentation system enables you to increase participant numbers while allowing your participants optimal evaluation of the congress afterwards.
